

Divyansh Verma

📍 Greater Noida, U.P 📞 +91 6387569484 ✉ vdivyansh1235@gmail.com in LinkedIn 🐙 GitHub

Career Objective

Motivated B.Tech (Artificial Intelligence and Machine Learning) student with strong fundamentals in programming, data structures, and machine learning principles, with a solid understanding of software design and problem-solving. Passionate about building efficient, scalable, and reliable software solutions, and eager to apply technical skills to real-world engineering challenges while continuously learning new tools, frameworks, and best practices as a developer.

Education

Noida Institute of Engineering and Technology <i>B.Tech – Artificial Intelligence & Machine Learning</i>	2023 – Present
Dr. Virendra Swarup Public School <i>Senior Secondary (XII) & Secondary (X)</i>	2020 – 2023

Technical Skills

- **Programming Languages:** Java, Python
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming
- **Databases:** MySQL
- **Machine Learning:** Scikit-learn, TensorFlow
- **Deep Learning:** CNN, LSTM, NLP
- **Web Development:** HTML, CSS, JavaScript
- **Tools:** Git, GitHub

Internship

Machine Learning Intern – CodSoft <i>Virtual Internship</i>	Sep 2025 – Oct 2025 <i>Remote</i>
---	--------------------------------------

- Built machine learning models for movie genre classification, credit card fraud detection, and customer churn prediction.
- Performed data preprocessing, feature engineering, and model optimization to improve model performance and accuracy.

Projects

AQI Prediction using Computer Vision and LSTM <i>A computer vision-driven system to estimate and forecast Air Quality Index (AQI) from sky images using CNN, ensemble heuristics, and LSTM-based time-series prediction.</i>	2026
--	------

- Collected and preprocessed sky image, weather, and pollution datasets for AQI analysis.
- Developed CNN and LSTM models to estimate and forecast Air Quality Index (AQI).
- Performed data analysis and model evaluation to improve prediction accuracy and forecasting performance.

Hotel Management System <i>Java, Swing, JDBC, MySQL</i>	2025
---	------

- Built a Hotel Management System with features like room booking, customer management, billing, employee management, and report generation.
- Connected the application to MySQL using JDBC and followed object-oriented programming concepts to organize the code.

Certifications

- Building Machine Learning Systems with TensorFlow – Infosys Springboard
- Deep Learning for Developers – Infosys Springboard
